DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art discloses a prime mover adapted for submersion in a current of water for extracting power from the current of water having a body and hydroplanes changing directions. However, the prior art fails to show, in combination with the invention and in light of the specifications, a first and second hydroplanes mounted on the body and extending from respective sides thereof, the angle of inclination of the hydroplanes with respect to said current flow being operatively changeable by rotation of the hydroplanes in unison about a common axis which axis passes through the body and which axis is substantially perpendicular to the direction of flow of the current, the hydroplanes being operatively rotatable in unison about said axis between a first positions in which the angle of inclination is such that the action of the current on the hydroplanes is effective to generate thrust in a first direction and thereby to move the body in said first direction and a second positions in which the angle of inclination is such that the action of the current on the hydroplanes is effective to generate thrust in a second direction opposite to the first direction and thereby to move the body in said second direction and having means for rotating the hydroplanes from a said

first position to a said second position when the body is moving in the first direction and for rotating the hydroplanes from said second position to a said first position when the body is moving in the second direction thereby causing the body to execute a controlled oscillation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
